

3. **APPROVAL OF THE OFFICIAL MINUTES OF PREVIOUS MEETING:**

- a. Minutes - Board of Trustees Workshop - June 19, 2000

\_\_\_\_\_ Approved – consent agenda.

b. Minutes - Board of Trustees Meeting - June 19, 2000

Mrs. Martinez made a modification to the June 19, 2000, Board of Trustees minutes.

Mrs. Silvernail moved approval of the Board of Trustees meeting minutes of June 19, 2000, as amended. Mrs. Martinez seconded the motion. All those voting in favor of the motion - Silvernail, Martinez, Handley, Penn Williams, Johnson; opposed - none. Motion unanimously approved.

4. **COMMUNICATIONS:**

a. Report on Nursing Programs - Dr. Fettrow/Ms. Bobik

Dr. Brenda Fettrow, Cocoa Campus President, introduced Ms. Connie Bobik, Department Chair for Nursing. Ms. Bobik provided a visual presentation and reported in the department of nursing the associates degree in nursing, practical nursing and patient care technician programs are offered. Admissions for the nursing program are held annually in August and 60 students are admitted, based upon the State Board of Nursing Rules and Regulations. An admissions committee comprised of various disciplines make the decision for acceptance into the nursing program. The transition program is open to LPNs, paramedics and respiratory therapists and through a transition course may enter into the second year of the associate degree nursing program. The maximum number of students presently allowed is 60 in the freshman year and 84 in the sophomore 2 Tc0.00insibopCe18 TD

The Patient Care Technician program has several components as healthcare facilities require healthcare workers now. The components of the Patient Care Technician program are Nursing Assistant, Home Health Aide, Patient Care Assistant, EKG Aide, Phlebotomist and Patient Care Technician. The first four areas are offered as a dual enrollment program at the high schools.

Ms. Bobik reviewed department highlights which included the Nursing Awareness Open House, Nursing Lab, Human Patient Simulator, Nightengale Tracker, Service Learning and student and faculty awards and recognitions. It is expected by the year 2005, there will be more than 4 million people older than 60 and 400,000 over 85 years of age. Healthcare delivery is ever changing and moving fast into the community.

Ms. Bobik reported in order to provide the appropriate types of experiences for the students they have to meet certain criteria for the state, therefore, the limit is set according to that factor for students enrollment in the nursing program. In October the Board of Nursing will be going through a rules workshop and at that time a number of changes will be presented by BCC in order to be able to use some of the innovative types of things, i.e., human patient simulator to supplement those required experiences.

Ms. Bobik reported the students do not have difficulty in obtaining jobs upon graduation. Dr. Gamble reported the clinical access is the largest limiting factor and BCC does compete with UCF's nursing program for clinical experiences. Ms. Bobik answered questions presented by the Board of Trustees.

5. CITIZEN'S PRESENTATION:

None

6. CONSTRUCTION AND DEVELOPMENT:

a. Status of Construction Report - Mr. Little

Mr. Al Little, Vice President of Finance and Administrative Services, reported on the progress made on the Palm Bay expansion project. Progress is being made on the library/science building. The structure is expected to be dried in by the end of September at which time will begin the task of electrical, plumbing, drywall and other aspects of construction to complete the project. Dr. Purga has been working with the college purchasing department on equipment needs for the building.

The BCC/UCF joint-use facility is the only aspect of the expansion project left to contract. Advertising is being done for a construction manager and a proposal for that will be brought to the Board next month. The financial issues with the architects have been resolved and Stottler Stagg has agreed to pay \$22,000, which is the difference between change order #1 and the cost the college would have incurred had the proper documentation been in the bid package. A new architect has been placed on the project and the college is pleased with the progress he is making with an improved communication line being maintained. The plans for the BCC/UCF joint-use facility are currently 60% complete. UCF was unable to identify funds to build a fourth floor on the building, therefore this will be a three story structure. Ground breaking on the building should take place by the end of the year with the finalized plans being presented to the Board for approval in October. The science and library building is expected to be available for occupancy next summer and the joint-use building should be complete by December 2001.

Mr. Little provided an update on the welcome center plans and stated he expects to bring the final a contract to the Board at the next meeting. The construction manager and the architect are working on finalizing the plans and preparing the cost estimates for both the Cocoa and Melbourne projects. Next summer is the anticipated completion date for both projects.

Work is progressing for the Titusville Campus HCAV project. Construction will continue for most of the summer.

Mr. Little recognized the college's maintenance crew who have successfully completed approximately 100 renovation and repair projects across the college's campuses. He recognized Mike Jones from the maintenance staff who was in charge of all of the projects and commended him for the fine job he has done.

Mr. Little reported the performance contract with FP&L is progressing. FP&L is currently working on their energy survey and will meet with BCC representatives once it is complete. They are working with the college on the Titusville A/C project.

The college is connected with Time Warner between the Cocoa and Melbourne campuses and the Melbourne and Palm Bay campuses. The connection should be up in the near future with Titusville. The response time has been extremely satisfactory. Mr. Little reported from the input he has received, the Time Warner connection has exceeded all expectations.

b. Midwest Research Institute Quarterly Report/Business Plan - FY 2001 -  
Dr. Purga/Dr. Hall (Addendum)

---

Dr. Bert Purga, Palm Bay Campus President, introduced Dr. Andrea Hall, Senior Vice President of Midwest Research Institute (MRI). Dr. Hall reported on preliminary figures for the quarter and reported MRI did sustain losses due to some contracts which had been in place for a number of years prior to the management and operations agreement. The contracts do not fully cover the costs of the activity, therefore, it was anticipated there would be some losses during the year. Dr. Hall estimated for the first closing, which will be in approximately ten days, the profit for the year will be between \$50,000 and \$60,000 for the full year. Dr. Hall reported one of the objectives was to change the business mix and slowly work off contracts which are not covering costs and to bring in more business that is more in the research as opposed to testing line. There were strong sales of more than \$4 million and a variety of new clients were added.

Dr. Hall reviewed the MRI Florida Division/Florida Teaching and Research Laboratory FY 2001 Business Plan. SacoAd(lie)4007Oborat5To

b. Revisions to College Policy #102.06, #103.01 and #400.05 (1<sup>st</sup> Reading)

\_\_\_\_\_ 1<sup>st</sup> reading acknowledged as part of the consent agenda.

c. Review of State Audit, Year Ending 1999 - Mr. Little

Dr. Gamble stated the college is extremely proud of the audit which has taken place this year. It is reflective of the effort of Mr. Little and his staff to see that the college is placed in the best possible posture.

Mr. Little briefly reviewed the operational audit for the fiscal year ended June 30, 1999. He reported the auditors reviewed all aspects of the college over several months in order to prepare the report. There were only two findings in the report, one of which repeats concerns regarding a direct support organization which lost money for several years. Having only two findings in the report placed the college in an elite group and due to the results of the audit, the Auditor General's office has decided they will not need to perform an operational audit on BCC this year. Due to their heavy workload, they are skipping audits on colleges having excellent results. Only six of the 28 community colleges fall into this category.

BCC has reduced the number of findings in the audit from as many as fourteen two years ago to two for this year. The only new finding is with regard to the college's budgeting of student activities and services fee. Some expenditures in this area were questioned by the auditors as they were not included in the budget approved by the Student Activities Counsel. This was an administrative oversight which came at a time when both the position of Vice President for Finance and the Associate Vice President for Accounting were vacant and the individuals preparing the budget were not aware of everything which should be included in the budget submitted. The complete student activities and services budget has been approved by the Student Activities Counsel for both the past 1999-2000 and the 2000-2001 year. No further problems are anticipated in this area.

d. Selection of College Attorney - Dr. Gamble

Dr. Gamble reported it is important to recognize that the contract for attorney's services is with the Board and not the administration of the college. At the present time the college's contract allows the continuance of the existing arrangement until the Board makes a decision. Dr. Gamble reported the college solicited more than 400 legal firms in Brevard County and a few out of county firms. Seven applicants were received in response to the RFP which was sent out.

The Board went through a process of reviewing materials from those firms and selected four finalists – Amari and Theriac, Dean Mead, Holland and Knight and Joe Matheny. The presentations held prior to the Board meeting included a fifteen minute exposition by the firm and time for questions.

Mr. Johnson spoke positively regarding Mr. Matheny's presentation and his 32 years of experience with the college and felt strongly about continuing services with Mr. Matheny. Mrs. Martinez requested Dr. Gamble's comments pertaining to the quality of Mr. Matheny's services. Dr. Gamble spoke favorably regarding Mr. Matheny's services and he stated the college administration would be supportive of continuing Mr. Matheny as the attorney. Mrs. Silvernail recommended a two-prong approach to meeting the college's legal needs. It was the consensus of the Board to go with a two-prong approach. Dr. Gamble felt it would be feasible to continue with Mr. Matheny as the primary attorney and refer to another firm cases which require other expertise. Mr. Handley spoke favorably regarding the firm of Amari and Theriac, although he felt all four firms were excellent. Mrs. Silvernail felt the law firm of Holland and Knight offered a wide variety of expertise, especially in the area of union negotiations and employee relations. Further discussion followed on attorney services and needs of the college.

Dr. Penn Williams moved approval to retain the legal services of Mr. Matheny, year-to-year, and that Holland and Knight serve as the legal referral company that Mr. Matheny would utilize them for matters out of his area of expertise and that this be revisited at the end of a year. Mrs. Silvernail seconded the motion. All those voting in favor of the motion - Penn Williams, Silvernail, Handley, Martinez, Johnson; opposed - none. Motion unanimously approved.

Mrs. Martinez felt it important that Dr. Gamble work with Mr. Matheny to find a way to transition things over the months ahead. It was the consensus of the Board to place legal services on the agenda for the August workshop.

**9. FINANCIAL ACTIONS:**

- a. Approval of Capital Outlay Budget, 2000-2001 - Mr. Little

the Board's approval. He briefly reviewed the highlights of the budget. The proposed budget for the 2000-2001 year totals \$29,571,619.65 which includes funds carried over from the 1999-2000 year of \$23,790,814.36 and new funding totaling \$5,780,805.29. Each campus has also submitted a list of smaller projects to renovate or repair areas on campus. The campus based projects are projected at \$900,000 collegewide. Mr. Little answered questions presented by the Board.

Mrs. Silvernail moved approval of the Capital Outlay Budget for 2000-2001. Mrs. Martinez seconded the motion. All those voting in favor of the motion - Martinez, Silvernail, Penn Williams, Handley, Johnson; opposed - none. Motion unanimously approved.

b. Acceptance of Florida Teaching and Research Laboratory Audit, Year Ending 1999 - Mr. Cherry

---

Mr. Mark Cherry, Associate Vice President for Accounting, answered questions presented by the Board.

Mrs. Silvernail moved approval of the acceptance of the Florida Teaching and Research Laboratory Audit, Year Ending 1999. Mr. Handley seconded the motion. All those voting in favor of the motion - Silvernail, Handley, Penn Williams, Martinez, Johnson; opposed - none. Motion unanimously approved.

c. Write-Off of Florida Teaching and Research Laboratories Cash Advance

Mr. Little reported over the years the college had paid the expenditures of the Florida Teaching and Research Laboratories if funds were not available on the FTRL books. The expenditures were charged to the FTRL expense accounts, but the cash came from college accounts. This created a temporary cash advance that has become more than temporary. With the commencement of the MRI agreement the necessity to cover expenses with college money has ceased. The college books, however, still record a temporary cash advance to the FTRL totaling \$2,477,411.59 at June 30, 2000. It becomes more apparent that the cash advance is unlikely to be repaid to the college. The Board was asked to approve the write-off of this asset from the college's records. In the event funds become available to repay the advance, the college retains the right to collect. Mr. Little reported the college will have a sufficient fund balance to cover the state minimum requirements after the asset is removed from the books. Mrs. Silvernail commended the college administration for this accomplishment.

Mrs. Silvernail moved approval of the write-off of the Florida Teaching and Research Laboratories cash advance. Mrs. Martinez seconded the motion. All those voting in favor of the motion - Silvernail, Martinez, Penn Williams, Handley, Johnson; opposed - none. Motion unanimously approved.

d. District Presiden

The motion was amended to approve the extension of Dr. Gamble's contract for one year and to include a 2% salary adjustment. All those voting in favor of the motion - Handley, Silvernail, Penn Williams, Martinez, Johnson; opposed - none. Motion unanimously approved.

**10. REPORT OF THE DISTRICT PRESIDENT:**

a. Student Center

Dr. Gamble reported the college is approaching the reconstruction of the student center which required everyone being moved from the student center to the Dobson Center. The move to the Dobson Center was a relatively smooth transition which he felt was due to the spirit of staff and their willingness to embrace change. He felt they are looking forward to the completion of the Welcome Center and also felt the smooth transition is a credit to physical plant who came in and made the move in such a manner that there was very little disruption of service.

b. State Board of Community Colleges

This past week BCC hosted the State Board of Community Colleges. The general feedback from the State Board was extremely positive. Thursday was spent on the Cocoa Campus and the Friday meeting was held in the Debus Center, which is a new conferencing center at Kennedy Space Center. As part of that meeting there was a presentation on the new center for Aerospace Development. The college is preparing a business plan for that entity of the college as per the Board's request which will be brought to the Board at the August meeting. The college has received notification from the National Science Foundation that it is among the finalist for distinction as a National Center of Excellence. If successful, the college will receive up to \$1,000,000 a year for three years, in addition to industry match, and state, local and private funds that are designated for this same purpose.

c. Fall Enrollment

Dr. Gamble reported fall registration begins July 24 and he is looking forward to hopefully improving the enrollment status from last year. This drop in enrollment has been all through the state, as well as across the country.

d. New Faculty-Staff Benefits

Dr. Gamble reported this fall it is hoped to have two new benefits for faculty and staff. The first benefit would be discounted tickets for King Center performances on selected performances. He felt with the wonderful facility and performances available that faculty and staff should have the opportunity to be able to participate. Secondly, a benefit proposing a new tuition waiver program for full-time and permanent part-time faculty and staff of the college to take courses at BCC is being finalized. The program will enable courses to be taken on a space available basis.

e. Accelerated Degree Options

Dr. Gamble reported this fall two new accelerated degree options are being offered, both of which have been featured in the new fall schedule. The weekend college in Melbourne will concentrate on offering classes in the evening and all day Saturday, which will allow a student to complete an associate degree in less than two years in a fairly concentrated approach. The second program is a concentration factor utilizing regular classes and on top of that using the minimester courses that are available. Those students who can handle the load will have opportunities to advance more quickly.

f. Fall Welcome Back Day

Dr. Gamble reported August 17 from 8:30 a.m. until Noon will be the Welcome Back Day and all faculty and staff will be assembled at the King Center for an opening session. He invited the Board to attend.

g. Commencement

Dr. Gamble reported the college will be conducting two commencements on August 5. The Titusville/Cocoa commencement will be at 3:00 p.m. and the Melbourne/Palm Bay commencement will be held at 7:00 p.m. Both of the ceremonies will be held in the King Center.

h. College Goals Workshop

Dr. Gamble reported August 18 and 19 the College Goals Workshop has been scheduled which will be held on Friday and Saturday for the Board. He reminded the Board to submit their goals and priorities on the check-off sheet in advance of the meeting so that a sense of the Board's priorities can be provided at the meeting. The workshop will begin on Friday, August 18 at 3:00 p.m. and will be held on Saturday, August 19 from 9:00 a.m. until Noon.

i. Administrative Matrix

Dr. Gamble reported a copy of the administrative matrix assignments has been provided to each Board member.

j. Student Follow-Up

Mrs. Silvernail asked the status of the follow-up phone calls to be made to students. Ms. Bilsky reported any student who has turned in an application will receive a call back. Dr. Gamble reported each of the college's deans has been working hard on enrollment efforts for the past six months.

**11. ADJOURNMENT:**

There being no further business to come before the Board, the meeting adjourned at 5:54 p.m.

**APPROVED:** \_\_\_\_\_  
**Chairman, District Board of Trustees**

**ATTESTED:** \_\_\_\_\_  
**Secretary, District Board of Trustees**
